Google Apps for Android 6.0.1 Marshmallow ARM Stock/Full/Mini/Micro/Nano/Pico/Aroma/Super Need to download the Gapps Flashable.zip package for your CM13 / Android 6.0.1 Marshmallow ARM devices such as Xiaomi, Senfon, Meizu and more, this is your central location to get the perfect Gapps build! With 7 different Gapps options for you to download you are going to find the perfect one that fits your needs and just works! Have limited storage? Use Pico, Nano or Micro. Want all your major Google apps like Gmail, YouTube, Maps, Camera? Use full or stock! Almost every custom ROM requires you to flash Gapps right after the ROM flashes. Custom ROMS like MIUI, Baidu OS, XUI, Flyme OS, zenui, Lineago OS, C yanogenMod, Paranoid Android, AOKP, etc. all require it! Without flashing Gapps you won't have access to any Google services like the Play Store, Chrome, YouTube and Gmail for example: You can't access videos on YouTube using the Youtube Android app other than using the URL browser, or you can't play Clash of Clan games conveniently unless you have a GooglePlayGame or GooglePlay service installed on your device. So for this reason this article was created to make it easier for you to download and implement Google Apps on your Android device. You don't need to thank you Boycraked.com because Android is a trademark of Google Inc as well as the Opengapps team in making this GoogleGapps package. Notes: If you can't flash Gapps, please try using custom recovery like, TWRP, CWM or Carliv. Before you start downloading the file below, I suggest you pay attention to the image below to make sure that everything that happens after installing this Google package at your own risk. How to install Gapps: Download and install SpecDevice.apk V1.1.7 (V1.1.5) on your Android device Test full specification of your android device or see your build.prop Ignore line ro.build.version.5.1.1 Because this piece is easily manged by the developer, but see the ro.build section.version.sdk... and ro.product.cpu... For example: ro.build.version.sdk-21 means that your Android version is Android 5.1 Lollipop ro.build.version.sdk-Arm64 means that your Android architecture Arm64 / 64bit Or if: ro.build.version.sdk-22 means that your Android version Android Android is Android 6.0 Marshmallow.ro version.s Means that your Android Architecture Arm32 / 32bit Download Gapps Flashable.zip respectively with your ro.build.version.sdk ... and ro.product.cpu... your android device. Flash Gapps flashable.zip through recovery mode. (TWRP is a commanding) Don't download from unreliable places where you could put your phone in danger! Use download links below to download Gapps for Android 5.1.1 Lollipop Arm64 directly Open Android Project ! Download Google Gapps Stock 6.0.1 Marshmallow ARM Download full Google Gapps for Android 6.0.1 Marshmallow ARM Download Mini Google Gapps for Android 6.0.1 Marshmallow ARM Download Micro Google Gapps for Android 6.0.1 6.0.1 6.1.1 ARM Download Nano Google Gapps for Android 6.0.1 Marshmallow ARM Download Pico Google Gapps for Android 6.0.1 Marshmallow ARM Two years ago Google released Android 6.0/6.0.1 open source for Android device. Currently, Android Marshmallow is the most common version of Google's Android. So many users before need GApps for the Android Marshmallow 6.0/6.0.1 device. Here we share a direct link to download Google GApps for Android 6.0.1 Marshmallow. You can get full, mini, pico GApps packages from here. Most custom ROMs comes without GApps so you need to flash The Gapps.zip file one by one. Also, if you are importing the device from China, then you are faced with the same problem, chines version of the device come without GApps, if you use Marshmallow, then you need to flash marshmallow Gapps. Google has launched its latest GApps for 6.0.1 Marshmallow. The entire version of Marshmallow GApps download from here. Also see: Download Google Gapps for Android 6.0 Marshmallow Rom's If you want to use Google apps such as Gmail, Google, Play Store and other Google apps, you need to install GApps for Android 6.0. Currently Nougat and OREO are both released for Android devices, but Marshmallow is the most using android OS. Also, if you want to use any Android 6.0/ 6.0.1 Custom ROM like Lineage, Resurrection Remix, AOSP and others, then you need to install GApps for Android 6.0.1. Here we share all the direct links to download Google GApps for Marshmallow Android 6.0/6.0.1. We share all GApps direct link from Open GApps. Here you can find Pico, Mini and The Complete Gapps. In this package, you'll get a minimum GApps setup. Like Google System Library, Google Android Sharing Service, Google Play Store, Google Calendar Sync, Dialer Framework Google Package Installer, Google Play services. Download GApps for ARM DEVICE Download GApps for ARM64 Download GApps for X86 Devices This package is designed for users who use limited Google apps or prefer to install their own apps. In this package you can find the basic basics of Google System, Google Android Sharing Services, Offline Voice Files, Google Play Store, Google Exchange Services, Face Detection for Media, Face Unlocking, Set Framework and some Google Apps. Download GApps for ARM DEVICE Download GApps for ARM64 Download GApps for X86 devices You can also, like: Universal Gapps for Miui 6 and Miui 7 Custom Package You can find the basic basics of Google system, standalone voice files, Google Play Store, Google Exchange services, facial recognition for smi, face unlocking, and the following Application Play Store Watch replaces stock/AOSP watch, Google, Google Calendar, Google Now Launcher, Google Search, Google Text-to-Speech It's almost the same as Stake. Download GApps for ARM devices Download GApps for ARM64 DEVICE Download GApps for X86 Devices Download what size GApps you need. Copy the Gapps zipper to the inner or outer disk. Then turn the phone phone Recovery Mode Now click on Set, Go to Gapps zip. Swipe to set. Clear the cache. Restart. Also see: If you have any problems make comments below. Also, for more information on things like ROM, wallpaper, themes, etc. like our Facebook page. GAPPS 6.0.1 Last UPDATE: - Latest package update - ARM64 SUPPORT 19.04.2017 - ARM64 received SPECIAL OPTIMALLIZATION FOR XIAOMI (MTK) DEVICES . - Optimization. Info: A-GAPPS: 6.1 Anroid: 6.0.x UPDATE: 18.04.2017 Work and testing on: Cm13, OmniROM 6.0.1, AOSP 6.0, etc. - without screen configuration - 37-65 MB (hand or arm64) - for slow phone - with the ability to optimize the battery Google Service DOWNLOAD IN SECOND POST If not synchronized working contacts. Try this: Go to the permission contacts click on the show system applications and give each application permission, then go for a storage permit and do the same A-GAPPS 7.0 nougam A-GAPPS 8.0 THANK YOU for USE! Mirror: sendspace.com/file/sqnptx Page 4 4 January 2016, 05:04 PM No #31 Quote: Originally published by MarcelRobinson May I also get pm (: Check pm The Post added at 05:04 PM ---------- The previous post was at 05:03 PM ---------- Be sure to thank the OP on January 4, 2016, 06:03 pm #32 do not see a link to 6.0.1 can someone provide? Thank you! January 4, 2016, 6:22 p#33 I don't know why the link doesn't work for some, but it works great for me. Try Try browser if @dracov76 will allow me to post my mirror link? January 4, 2016, 06:30 #34 quote: Originally published by Corduroysack I don't know why the link doesn't work for some, but it works great for me. Try a different browser if @dracov76 allow me to post my mirror link? I'll take the PM, if you don't mind, thank you in advance! Also, I tried in IE, still unable to download the latest build, 6.0.1, only 6.0 available. January 4, 2016, 06:38 PM No #35 Member of the HG More Try this link (another step further from the original link from post 1): PS: the original probably doesn't work for those who don't have an active session on their Google account. January 4, 2016, 6:41 p.m. No #36 Thank you, but I'm trying to download version 6.0.1 January 4, 2016, 6:57 p.m. #37 (06:57) January 4, 2016, 10:44 PM No #38 OP Senior Member More Name NAME 6.0 because it's GAPPS WORK ON 6.0.0 and 6.0.1 @Corduroysack no problem, you can insert a mirror on January 13, 2016, 04:25 PM (#40 Lack of contact synchronization Resolved works well, but it doesn't have synchronization, which is very important to me. Resume: Sorry, I find contact synchronization now. thanks for a good job. 13 January 2016, 07:59 PM (#41 OP Senior Member Read More quote: Originally published daiwen.xmu Resolved works well, but it has no contact synchronization, which is very important to me. that you managed to solve this problem because the contact is synchronization. Good job :P Page 5 18 January 2016, 07:47 PM No #51 Member Heerlen More Unable to install on a 64-bit device I can't go trough the setup assistant because Play Services stops. HTC one m9 with CandySix 6.0.1 January 18, 2016, 08:32 PM No #52 OP Senior Member Read More quote: Originally published ricjuh Can't install on a 64-bit device I can't go trough the setup assistant because Play Services stops. HTC one M9 with CandySix 6.0.1 For slow phone! Your processor is 64 bit very fast on your phone :P only for 32bit, sorry :/ 19 January 2016 08:17 #53 member Heerlen Read more Quote: Originally published as dracov76 For slow phone! Your processor is 64 bit very fast on your phone :P only for 32bit, sorry :/ No problem, I was just looking for good Gapps to solve my problem on January 22, 2016, 03:30 pm No #54 junior member Of Read Hello again, is Gmail and Google App and Google Play Kiosk included in this package ! Because I get the following messages failure now : Gmail was stopped Google App was stopped Google Play Kiosk was stopped If not, could you prepare a larger version like GAPPS micro, where are they included? PS: I use the latest CM 13.0-20160122-NIGHTLY on my Galaxy S3 January 22, 2016, 07:36 PM No #55 OP Senior Member Read More Quote: Originally published pluscss Hello again, is Gmail and Google App and Google Play Kiosk included in this package !
